SUMMARY

Third-year Information Technology engineering student focused on Cloud Engineering and Cloud Security. Hands-on experience with Linux/Ubuntu server administration, Nginx, user and permission management, SSH, service troubleshooting, networking, Python, Git and AWS cloud fundamentals. Building practical cloud engineering skills through the CloudVault learning project, server deployment and web-service configuration.

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology · Sinhgad Institute of Technology (SIT), Lonavala | Savitribai Phule Pune University (SPPU)

Currently in Third Year Engineering

EXPERIENCE

CloudVault - Cloud & Linux Administration Project · Personal

- Configured and administered a local Ubuntu/Linux server environment in a VirtualBox lab for hands-on cloud engineering practice.
- Deployed and verified an Nginx web service and used systemd/systemctl to manage and troubleshoot the service.
- Created and managed Linux users, groups and file permissions; practiced SSH and core Linux administration commands.
- Diagnosed command, service and configuration issues and restored the Nginx service to a working, testable state.
- Verified a working user-login flow after resolving configuration issues, strengthening practical Linux troubleshooting skills.

Data Engineering & Visualisation Project · Personal

- Built an interactive Streamlit dashboard in Python using Pandas and Plotly for weather and AQI analysis.
- Worked with weather and AQI datasets covering Lonavala, Pune and Delhi.
- Integrated external data sources and presented location-based results through an interactive web interface.

Data Analysis Project · Personal

- Collected cryptocurrency market data using the CoinGecko API and PyCoinGecko.
- Processed market data with Pandas and created interactive candlestick visualizations with Plotly.

Graphics Programming Project · Personal

- Developed a C++ OpenGL rendering project using GLFW, GLAD and GLM.
- Implemented window creation, triangle and cube rendering, camera controls and a basic 3D scene with a grid.

Machine Learning Academic Project · Sinhgad Institute of Technology

- Explored a machine-learning approach to transaction fraud detection using Python and scikit-learn.
- Worked on data preparation, feature analysis and model evaluation.

SKILLS

AWS · EC2 · S3 · IAM · VPC · CloudWatch · cloud computing · cloud architecture · shared responsibility model · Linux administration · Ubuntu · SSH · users and groups · file permissions · systemctl · apt · Nginx · IP addressing · DNS · HTTP/HTTPS · TCP/UDP · CIDR · NAT · subnets · basic network security · authentication · authorization · least privilege · encryption · hashing · firewalls · CIA triad · Python · Java · SQL · MySQL · SQLite · Docker fundamentals · Git · GitHub · VS Code · Jupyter · Streamlit · Pandas · NumPy · Matplotlib · Plotly · scikit-learn · Requests · BeautifulSoup · PyCoinGecko · DevOps · Data Analysis · Machine Learning · C++ · OpenGL

PROJECTS

- **Linux Cloud Server and Web Server Deployment:** Configured a local Ubuntu/Linux server environment and deployed an Nginx web service, applying Linux administration, service management and cloud fundamentals.
- **CloudVault - Linux Administration Lab:** Practiced Linux users, groups, file permissions, SSH, systemctl and troubleshooting while building a repeatable cloud-engineering lab.
- **Weather and Air Pollution Analysis Dashboard:** Built an interactive Streamlit dashboard in Python using Pandas and Plotly for weather and AQI analysis.
- **Bitcoin Market Analysis:** Collected cryptocurrency market data using the CoinGecko API and PyCoinGecko and processed it with Pandas.
- **OpenGL Mini Rendering Engine:** Developed a C++ OpenGL rendering project using GLFW, GLAD and GLM.
- **Transaction Fraud Detection - Academic Project:** Explored a machine-learning approach to transaction fraud detection using Python and scikit-learn.

CERTIFICATIONS

- AWS Cloud Solutions Architect Professional Certificate - Coursera
- IBM Data Science Professional Certificate - Coursera

AREAS OF INTEREST

- Cloud Engineering | Cloud Security | Linux & Server Administration | DevOps | Networking

TOOLS

Git · GitHub · VS Code · Jupyter · Streamlit · Docker · Nginx · apt · systemctl · VirtualBox
